Observational Drawing Class I & II

****Destroy the symbol system!***

****Express yourself!***

****Did you know that learning to draw is actually learning to SEE?!!***

“The goal in drawing is to encounter the reality of experience--to see ever more clearly, ever more deeply.”-Betty Edwards, Drawing on the Right Side of the Brain I believe drawing teaches habits of close observation that will always be useful. When we draw from life we look intently at our subject and explore many ways of making marks that describe our perceptions and experience of the physical world. In this class students will be introduced to classic and time honored exercises such as blind contour drawing, in which they will be encouraged to make mistakes and learn to take it slow and easy, by focusing on SEEing what it is they are looking at (without naming or labeling) rather than trying to render a realistic representation of their subject. We will be taking a fresh, direct look at our subjects to explore form, structure and perspective with line. The aim of this class is to ignite a love of looking and to inspire students to see the world around them in a new and exciting way. Individual attention will be emphasized. All ages welcome. *Materials needed: pencils and inexpensive paper. *Suggested reading material: Drawing on the Right Side of the Brain, Betty Edwards. The Natural Way to Draw, Kimon Nicolaides.

****“Art should be concerned more with life than with art. When we use numbers we are using symbols, and it is only when we transfer them to life that they become actualities. The same is true with rules of drawing. They are to be learned, not as rules but as actualities. Then the rules become appropriate.” -Kimon Nicolaides, The Natural Way to Draw.

Instructor:

Marcia Camp has a profound love for drawing and is delighted to share her enthusiasm for the art of seeing. She is currently working to complete the Master of Fine Arts program at Fontbonne University where she has had the opportunity to study under, and assist in teaching, internationally renowned artist Victor Wang. She has participated in multiple group and solo exhibits in St. Louis and Illinois as both a student and professional.

Class Period:

Observational Drawing Class I: Sunday 3:20 pm - 4:05 pm, the 7th period

Observational Drawing Class II: Sunday 4:10 pm - 4:55 pm, the 8th period

Grade:

Observational Drawing Class I: age under 8

Observational Drawing Class II: age 8+

Book Arts -

The class we will offer would focus on elementary principles of paper engineering, symmetry (bilateral, radial, and other forms), and modern color theory. The teacher will include story development, but the emphasis would be on graphic arts.

Instructor: Robert Linnenbom

Class Period: Sunday 11:50am to 12:35pm, the 3rd period

Grade: age 5-8 years

The Magic of Math and Science -

The class entitled 'The Magic of Math and Science' will find us using magic tricks to explore basic elementary school science subjects. These would include simple machines, magnets and the electromagnetic spectrum, gyroscopes, sound waves, and much more. Math is the language of science, so we will have plenty of activities involving the number line and many math tricks, games, and puzzles.

Instructor: Robert Linnenbom

Class Period: Sunday 12:40pm to 01:25pm, the 4th period

Grade: age 7-12 years

形体健康养生班 -

专为已有模特儿基础，或是毕业於《模特儿形体仪态班》的学生而設。此課程的特点是注入了养生的元素，学生除了可以通過不断练习模特儿步伐而达到健身及塑造身形的目的之外，更配合個人形象的完善与自我身體护理的养生内容，比外課程还加入了有关饮食养生的重要环节，包括四季养生及人体各部位常用的养生方法等...让学生能够由内到外学到全方位的 Keep fit 养生法，受益终生。

課程由國際資深模特儿、中医养生指导师文凭証书持有者 Kai M Ada Yim 编写并亲自教授，詳情請参阅其工作网站：www.adamodelt.com

Instructor: Kai M Ada Yim

Class Period: Saturday 3:30 PM – 4:30 PM

Grade: age 18 +

国际象棋 - 初级班

This class is for Chess beginner who need fundamental knowledge in Chess as well as student with a USCF (United States Chess Federation) score under 400-500 points. This class will teach students Chess rules as well as basic strategies to win the game.

Instructor: 周雪峰

Class Period: Sunday 3:20 pm - 4:05 pm, the 7th period

Grade: age 6+

国际象棋 - 中级班

This class is offered to students who have had some basic Chess background as well as student with a USCF (United States Chess Federation) score over 500 points. This class will teach students Chess strategies, tournament rules, and find right opponent to improve your game.

Instructor: 周雪峰

Class Period: Sunday 4:10 pm - 4:55 pm, the 8th period

Grade: age 6+

About the Instructor

周雪峰, He holds a PhD degree in Computer Science from Washington University in St. Louis and is currently working as a research scientist in Monsanto. He played Chinese chess (中国象棋), Bridge (桥牌), and Chess (国际象棋) in his youth years. With his background in Chess, he has helped his daughter Iris Zhou in Chess training through the years. The class will be assisted by Iris Zhou.

Iris Zhou is a 7th grader in Ladue Middle School. She started playing Chess since she was 6 1/2 years old and has progressed rapidly ever since. She is now a USCF (United States Chess Federation) Class A player and one of the top junior players in her age group in the nation. Iris has qualified the US national team to play in the World Youth Chess Championship since she was 8 years old. Currently she is the only K-12 player in Missouri who has ever played in WYCC. She has already qualified the 2017 national team and will compete in WYCC in Uruguay.
